BrightPath Tech - Response to RFP-2026-017

RFP-2026-017: Supplier Contract Management Platform. The buyer needs a cloud platform to store contracts, track obligations and renewals, integrate with its ERP and identity provider, and go live within 6 months for about 800 users.

1. Executive Summary and Understanding of the Requirement

BrightPath Tech offers the lowest-cost route to a working contract repository. We can have a first version live in 3 months using our standard product with light configuration.

We are a young company focused on speed and price.

2. Proposed Solution and Implementation Approach

Architecture: single-tenant application on one cloud region with nightly backups. Standard connectors cover CSV import and a basic REST API; ERP integration is done by file exchange.

Single sign-on supports SAML. Advanced obligation tracking is planned for a later release.

Approach: configure the standard product, load contracts, train users and go live.

3. Timeline, Team Structure and Milestones

Total duration 3 months. Milestones: configuration (month 1), data load and training (month 2), go-live (month 3).

Team: 1 project manager and 3 consultants. Backup staffing is not defined.

4. Price Table and Assumptions

Item	Cost (USD)
Licences, 800 users, 3 years	288,000
Implementation services	90,000
Data migration	15,000
Training	7,000
Total (3 years)	**400,000**

Assumptions: Fixed price. Customer provides data in CSV format. Extra integrations quoted separately.

5. Security, Compliance and Risk Controls

We follow industry best practices and use encrypted storage. A SOC 2 audit is being planned. We do not currently hold ISO 27001.

Detailed privacy and data residency documentation is available on request.

6. Support Model, Relevant Experience and References

Support is available on business days, 9am to 6pm, by email with a next-business-day response. No uptime SLA is offered.

Experience: 3 customer deployments, all with fewer than 200 users. One reference is available.
