NexaWorks - Response to RFP-2026-017

RFP-2026-017: Supplier Contract Management Platform. The buyer needs a cloud platform to store contracts, track obligations and renewals, integrate with its ERP and identity provider, and go live within 6 months for about 800 users.

1. Executive Summary and Understanding of the Requirement

NexaWorks proposes a proven contract management product delivered through a structured, low-risk programme. We understand the need to go live within 6 months with ERP and identity integration for 800 users.

Our strengths are a detailed, risk-managed implementation plan and a strong support model, at a mid-range price.

2. Proposed Solution and Implementation Approach

Architecture: multi-tenant cloud platform with two regions and automatic failover. Standard connectors for major ERP systems and SAML/OIDC single sign-on; a REST API with 60 endpoints.

Approach: a 5-phase delivery method (mobilise, design, build, test, deploy) with a joint steering committee and a fortnightly demo of working software.

3. Timeline, Team Structure and Milestones

Total duration 5.5 months. Milestones: M1 mobilisation and plan baseline (week 3), M2 design sign-off (week 8), M3 build complete (week 16), M4 integration and UAT (week 20), M5 go-live (week 23), M6 hypercare ends (week 27).

Team: programme manager, delivery lead, 4 engineers, 2 testers, 1 training specialist, with named backups for each role. A risk register is maintained weekly; the top 10 risks and mitigations are in Appendix B.

4. Price Table and Assumptions

Item	Cost (USD)
Licences, 800 users, 3 years	468,000
Implementation services	210,000
Data migration	30,000
Training and hypercare	27,000
Total (3 years)	**735,000**

Assumptions: Prices exclude taxes. Fixed price for the defined scope; change requests priced at the rate card attached. Licence uplift capped at 3% a year.

5. Security, Compliance and Risk Controls

Certifications: ISO 27001 certified; SOC 2 Type II report expected next quarter. GDPR compliant.

Controls: encryption at rest and in transit, role-based access, audit logging, and annual penetration testing.

6. Support Model, Relevant Experience and References

24x5 support with a 1-hour response for severity 1, a dedicated service manager, monthly service reviews and a 99.9% uptime SLA. A customer training academy and a user community are included.

Experience: 9 deployments of 500 to 1,500 users. Two references are provided with contact details.
