Summit Cloud - Response to RFP-2026-017

RFP-2026-017: Supplier Contract Management Platform. The buyer needs a cloud platform to store contracts, track obligations and renewals, integrate with its ERP and identity provider, and go live within 6 months for about 800 users.

1. Executive Summary and Understanding of the Requirement

Summit Cloud proposes a highly secure, compliance-first contract platform for regulated industries. We have reviewed RFP-2026-017 and understand the need for obligation tracking, ERP integration and single sign-on for 800 users.

Our focus is security and auditability. This results in the highest price of the proposals we expect you to receive and a longer schedule.

2. Proposed Solution and Implementation Approach

Architecture: single-tenant deployment in a dedicated private cloud with customer-managed encryption keys. Integration is through a certified API gateway; ERP connectors for SAP are included, other ERPs are built to order.

Approach: a gated delivery model with a formal security review at the end of every phase, followed by a staged production roll-out.

3. Timeline, Team Structure and Milestones

Total duration 9 months. Milestones: M1 security architecture approval (month 2), M2 platform build (month 5), M3 SAP integration (month 7), M4 penetration test and UAT (month 8), M5 go-live (month 9).

Team: programme manager, architect, 4 engineers, 1 security lead and 1 compliance analyst. The proposed schedule exceeds the 6-month target in the RFP; compression is possible only by reducing the security gates.

4. Price Table and Assumptions

Item	Cost (USD)
Licences, 800 users, 3 years	720,000
Implementation services	410,000
Dedicated environment and key management	95,000
Training	25,000
Total (3 years)	**1,250,000**

Assumptions: Prices exclude taxes. Dedicated hosting is mandatory. Annual licence uplift of 5%. Any scope change is quoted separately.

5. Security, Compliance and Risk Controls

Certifications: ISO 27001, SOC 2 Type II, ISO 27701 and FedRAMP Moderate. Independent penetration tests twice a year with reports shared on request.

Controls: customer-managed keys, hardware security modules, mandatory multi-factor authentication, immutable audit logs retained 10 years, data residency selectable by country, and a 1-hour incident notification commitment.

6. Support Model, Relevant Experience and References

Business-hours support with a 4-hour response for severity 1. 24x7 support is available as a paid option. 99.9% uptime SLA.

Experience: 5 deployments, mostly in banking and healthcare. One reference is provided; others are subject to customer consent.
